Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Please explain the reasons for your response.

This would prevent abuse of the system. If there was a form of means testing, it would involve unnecessary bureaucracy.

Pharmacies
Community centres
Health clinics
Secondary schools
