People shouldn't be left without them

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

Please explain the reasons for your response

I don't know the system

Q3. Which of the following best expresses your view in relation to a card-based system?

There is no need for a card scheme

Please explain the reasons for your response.

I think maybe a registration system rather than just having them available might have issues like people struggling to register, maybe certain groups feeling uncomfortable applying (second thoughts)

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All of the above hopefully -as widely as possible

Yes

Please explain the reasons for your response

They should be distributed as widely as possible
