Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

Please explain the reasons for your response

This will transform lives of women who are struggling to make ends meet. Been able to stay clean is surely a basic human right and it's one we can guarantee with very little resource.

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Please explain the reasons for your response

Yes - it strikes me as a discreet and decent way to operate the system.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

Please explain the reasons for your response.

Universal provision is consistently proven to be the most effective.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All of these places. It would be nice to think supermarket loos and major cafes would also participate. Places in community centres that women can access freely and with ease.

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

Please explain the reasons for your response

This is the only way to guarantee reaching younger women.
