

Proposed Sanitary Products (Free Provision) (Scotland) Bill

Page 2: About you

Are you responding as an individual or on behalf of an organisation?

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Please select the category which best describes your organisation

No Response

Please choose one of the following; if you choose the first option, please provide your name or the name of your organisation as you wish it to be published.

I would like this response to be anonymous (the response may be published, but no name)

Please insert your name or the name of your organisation. If you choose the first option above, this should be the name as you wish it to be published. If you choose the second or third option, a name is still required, but it will not be published.

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. We will not publish these details.

Page 7: Your views on the proposal

Q1. Which of the following best expresses your view of the proposed Bill?

Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Please explain the reasons for your response

It is time people realised that the cost of sanitary products is yet another demand on the budget of families with low incomes. If people have to stay away from school, college or work because they cannot afford them it has a long term impact on their life chances.

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Please explain the reasons for your response

Targets those who really cannot afford sanitary products

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Please explain the reasons for your response.

The scheme has to be financially viable so should be directed at those who really need free products. However it is important that women on low incomes get them as well and not just those on benefits.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Most communities have reasonably accessible pharmacies so this would seem like the best option

Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Unsure

Please explain the reasons for your response

Ensuring responsible and reasonable use would require the active involvement of students

Page 12: Personal experience (questions 6 and 7 are for individual respondents only)

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

No

Q7. If sanitary products were available for free, which of the following would apply to you?

Not applicable: I do not need or use sanitary products

Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector (e.g. local authorities, the NHS)		X				
(b) Colleges and universities		X				
(c) Businesses (including suppliers/retailers of sanitary products)			X			
(d) Individuals (including consumers of sanitary products)			X			

Please explain the reasons for your response

Government and colleges etc would have to find money for the scheme. Retailers and individuals would sell/buy same number of products so no difference to them

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

Not sure

Page 16: Equalities

Q10. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation?

Positive

Please explain the reasons for your response

Helps discrimination on the grounds of age. Younger women on low incomes either because they are students, in low paid jobs or at home caring for children most likely to experience period poverty.

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

Not sure

Page 18: Sustainability

Q12. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

Please explain the reasons for your response:

It would be of economic and social benefit if women did not stay away from school or college because they could not afford sanitary products. Hopefully that would lead to better employment prospects and put them in a position where they could afford them. It also seems to be an opportunity to lessen the environmental impact by only using sanitary products in the scheme which are environmentally friendly

Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

No, but good luck in getting the bill through
