Yes

**Please explain the reasons for your response**  
not everybody would need free this gives them a choice

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

**Please explain the reasons for your response.**  
there are those in society that would abuse the card

pharmacies would be a convenient location

the cost would add to the project

**Please explain the reasons for your response**

if setup correctly suppliers would have no increase in production however pharmacies would need to be monitored on point of sale prices to ensure they do not escalate there price
