Q1. Which of the following best expresses your view of the proposed Bill?

**Please explain the reasons for your response**

I think that there is evidence that period poverty exists and that it has an adverse impact on the lives of many women in our country and especially on the life chances of young women at school, college or university.

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

I think that a whole variety of locations should be considered, in order to avoid stigma consideration should be given to using shops and pharmacies as well as health locations and community facilities.

## Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

I think that this is a very welcome proposal. I think that it deals with a very real issue that impacts on the life chances of young women especially. The provision of the free products should be done in such a way that prevents any stigma being associated with this.
