Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

Please explain the reasons for your response

I am fully 100% supportive with the proposed bill, I think it is a huge step forward for girls, women and equality. As I am a young male I have the right to free condoms, but for females there is absolutely nothing for a very real and serious biological event which occurs every month. I believe this is extremely helpful and an advancement for women as many young girls and families cannot afford the costs of sanitary products so they are ultimately left in extreme pain with no support. This is a massive leap forward in bringing more sexual equality for females and I am very pleased with this proposed bill which I believe should have been implemented a long time ago.

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Please explain the reasons for your response

It wont be means tested and will not have a stigma attached to it.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

Please explain the reasons for your response.

Having the card based system available free for all with unlimited use, would ultimately remove a huge stigma of not being able to afford sanitary products, and feeling inferior to others. this also keeps it on a completely confidential based system.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All of the above would be suitable and appropriate, but they should be placed in all the school toilets, as well as any public toilets.

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

This is an extremely vital necessity and it is very simple and easy to use.

Please explain or give an example of your experience if you feel able to do so.

I am male.

Q7. If sanitary products were available for free, which of the following would apply to you?

I would expect to claim free products occasionally

Positive

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

there should be no stigma attached and a fair and reliable amount of money should be invested into the sanitary product system.

Yes

Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

the fact that this is only just now being highlighted in parliament and being implemented is disgraceful and extremely unequal. Monica Lennon is going to make great changes for women and equality in Scotland.
