Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

Please explain the reasons for your response

I don't know how this system works as I've never used it.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Please explain the reasons for your response.

There will always be some abuse of any system this may limit it.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Any or all of them if linked by a real time computer system which automatically updates.

Not sure how you could monitor this. So maybe not in the toilets but in the first aid room/nurses room possibly.
