Fully Supportive

Please explain the reasons for your response

Dignity for all whatever your income.

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

Please explain the reasons for your response

I do not know enough about all options

Q3. Which of the following best expresses your view in relation to a card-based system?

There is no need for a card scheme

Just give them out to all those asking for them. Its embarrassing enough asking for them without having to apply to get a card.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All the above.
