Q1. Which of the following best expresses your view of the proposed Bill?

Unsure

Please explain the reasons for your response

I dont think that sanitary protection should be entirely free but there should be some availability in public places such as schools and for emergencies.

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

No

Q3. Which of the following best expresses your view in relation to a card-based system?

There is no need for a card scheme

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Schools, colleges, health centres

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Unsure

Please explain the reasons for your response

As soap and toilet paper should be available, it is reasonable for sanitary protection to also be provided. However, we all know that these basics are often in short supply.

I always had irregular periods and was sometimes 'caught short'

Q7. If sanitary products were available for free, which of the following would apply to you?

Not applicable: I do not need or use sanitary products

Please explain the reasons for your response
