Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

Please explain the reasons for your response

I believe that the status quo is unjust and that action needs to be taken in order to tackle this injustice. As a result, I believe that the government have a duty to its citizens to ensure that they have access to basic sanitary products such as tampons and pads.

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Please explain the reasons for your response

I assume that the system would work, however I can't be sure as I am not entirely aware of the c-Card system.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Please explain the reasons for your response.

Whilst I believe that there should be limits, they should not be excessive and they should allow for 'extras' to be used if that is required in some months.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Most local facilities would be acceptable in my opinion, such as community centres and pharmacies, and local GP surgeries.

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

Not applicable: I do not need or use sanitary products

Q7. If sanitary products were available for free, which of the following would apply to you?

Not applicable: I do not need or use sanitary products
