Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

I think it may be but have not been able to consider alternatives not know enough about how the c-card scheme operates

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

pharmacies

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Unsure

Please explain the reasons for your response

I'm not sure how much work would be involved, who would do it and how funded. I'm slightly resistant to continually increasing responsibilities for educational establishments without considering these factors
