Positive

Please explain the reasons for your response

Q10. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation?

Males do not have these issues and do not therefore have these additional costs. Women do not have any choice in their need to buy these products. It is unfair that these costs for such a basic female physical requirement are not met by government.

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

No Response

Q13. Do you have any other comments or suggestions on the proposal?

This is more than addressing a physical need. It affects all menstrating females however, young girls in particular who's self esteem and confidence and can prevent them from socialising and participating in physical activity. It can cause humiliation and embarrassment
