Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

Please explain the reasons for your response

In our supposedly affluent western society how many people really stop and think what it would be like not to have money to buy the necessities, outwith food, such as sanitary towels which are just as important in their own way. We all know about food banks but this issue is a real hidden hurt and many women must feel a cruel sense of totally hitting rock bottom when they simply have no money for tampons/pads. Our femaleness is precious and unique - natures ways should be sacred and acknowledged and celebrated in a way that gives ALL women the support during menstruation that modern life offers.

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; card-holders should have unlimited access to free sanitary products

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

In as many easily accessible places as possible obviously depending on geographical situations.

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes
