

# Proposed Sanitary Products (Free Provision) (Scotland) Bill

## Page 2: About you

Are you responding as an individual or on behalf of an organisation?

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Please select the category which best describes your organisation

*No Response*

Please choose one of the following; if you choose the first option, please provide your name or the name of your organisation as you wish it to be published.

I am content for this response to be attributed to me or my organisation

Please insert your name or the name of your organisation. If you choose the first option above, this should be the name as you wish it to be published. If you choose the second or third option, a name is still required, but it will not be published.

Michelle McLachlan

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. We will not publish these details.

## Page 7: Your views on the proposal

Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

**Please explain the reasons for your response**

Being in the position where previously I've had to do I eat or buy sanitary products or wearing them much longer than should due to the cost! I have pcos which leads to very heavy periods and can bleed for two weeks to two months at a time the cost all adds up!

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

**Please explain the reasons for your response**

I'm not entirely sure how this works but I feel it could be a good idea available at all chemists and surgeries where women could get what they need

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

**Please explain the reasons for your response.**

Every female should be allowed access to free sanitary products it's not something that can be stopped or hygienically ignored! As for unlimited access not one person bleeds the same length of time or has the same period flow so where mrs x may only use four or five towels mrs y may use 50

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Gp surgeries, local chemists or local shops such as boots or the supermarkets

## Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

Every woman has been caught short and being in school this can be even more embarrassing and you can't just nip home to get changed and pick up products! If a girl has a male teacher it's hard to explain half way through a class!

## Page 12: Personal experience (questions 6 and 7 are for individual respondents only)

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

Yes, occasionally

**Please explain or give an example of your experience if you feel able to do so.**

There has been times where financially I couldn't afford them or being caught short when out and about

Q7. If sanitary products were available for free, which of the following would apply to you?

I would expect to claim free products occasionally

**Please explain the reasons for your response**

Having the option to buy could still be available however there are times where free would be good

## Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector (e.g. local authorities, the NHS)				X		
(b) Colleges and universities			X			
(c) Businesses (including suppliers/retailers of sanitary products)		X				
(d) Individuals (including consumers of sanitary products)					X	

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

Have the option to still be able to purchase the products

## Page 16: Equalities

Q10. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation?

Positive

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

I'm unsure

## Page 18: Sustainability

Q12. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

## Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

I don't
