

# Proposed Sanitary Products (Free Provision) (Scotland) Bill

## Page 2: About you

Are you responding as an individual or on behalf of an organisation?

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Professional with experience in a relevant subject

Please select the category which best describes your organisation

*No Response*

Please choose one of the following; if you choose the first option, please provide your name or the name of your organisation as you wish it to be published.

I would like this response to be anonymous (the response may be published, but no name)

Please insert your name or the name of your organisation. If you choose the first option above, this should be the name as you wish it to be published. If you choose the second or third option, a name is still required, but it will not be published.

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. We will not publish these details.

## Page 7: Your views on the proposal

Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

**Please explain the reasons for your response**

Q1. Which of the following best expresses your view of the proposed Bill?

Periods are an everyday part of life for a large portion of the population. They should not have a negative impact. At the moment menstrual hygiene products are expensive which is a barrier for those on low incomes. This can keep girls and young women out of education due to embarrassment.

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

**Please explain the reasons for your response**

Not sure how well the system works now for free condoms

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; card-holders should have unlimited access to free sanitary products

**Please explain the reasons for your response.**

A card would be most effective given to those in need. Preferably also for all those in education, as they often have to rely on parents for income. The amount shouldn't be limited as this differs greatly from person to person

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Educational establishments and all health care facilities. This makes access easy and simple.

## Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

Young people in education rarely have their own income

## Page 12: Personal experience (questions 6 and 7 are for individual respondents only)

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

Yes, occasionally

**Please explain or give an example of your experience if you feel able to do so.**

As a teenager having an unexpected period without access to anything can be really frightening and embarrassing. Having easy access at school would alleviate the situation greatly.

Q7. If sanitary products were available for free, which of the following would apply to you?

I would not expect to claim free products

**Please explain the reasons for your response**

I have a good regular income and I use reusable sanitary products which need very infrequent replacing

## Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
<b>(a) Government and the public sector (e.g. local authorities, the NHS)</b>			X			
<b>(b) Colleges and universities</b>		X				
<b>(c) Businesses (including suppliers/retailers of sanitary products)</b>			X			
<b>(d) Individuals (including consumers of sanitary products)</b>					X	

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

Could consider providing reusable sanitary products. These need replacing very infrequently and are relatively cheap. They are also better for the environment. There might however be some resistance from those not used to them. An idea would be to provide them to teenage girls at the end of primary/start of secondary and to teach as part of sex ed how they are used.

## Page 16: Equalities

Q10. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation?

Positive

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

By making any card system very easily accessible and not subject to complicated applications or tests.

## Page 18: Sustainability

Q12. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

## Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

*No Response*
