Q1. Which of the following best expresses your view of the proposed Bill?

For some people of lesser means sanitary products provided free of charge could be the difference of whether a mum is able to feed her children or if a young girl can attend school.

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

Please explain the reasons for your response

I don't know about the card based system for condoms.

Q3. Which of the following best expresses your view in relation to a card-based system?

There is no need for a card scheme

Please explain the reasons for your response.

Products should be available whether or not a card is at hand. The card could be lost or not available when it's needed.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All of the above and including in school.
