Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Please explain the reasons for your response

These products are essential . VAT should also be removed.

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Please explain the reasons for your response

These products should be available free of charge at multiple points - without feeling of discrimination/embarrassment.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

Please explain the reasons for your response.

Hopeful that those who could afford to pay would do so and not abuse the system. Remove VAT on all purchases.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Should be as many outlets as possible - e.g. Public toilets in stores, entertainment venues, health centres, large public service offices, schools.

Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

Yes, occasionally

Q13. Do you have any other comments or suggestions on the proposal?

This is a high profit area for manufacturers. Also advertising costs of such products must be high. Put advertising budget into free supply
