

# Proposed Sanitary Products (Free Provision) (Scotland) Bill

## Page 2: About you

Are you responding as an individual or on behalf of an organisation?

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Please select the category which best describes your organisation

*No Response*

Please choose one of the following; if you choose the first option, please provide your name or the name of your organisation as you wish it to be published.

I would like this response to be anonymous (the response may be published, but no name)

Please insert your name or the name of your organisation. If you choose the first option above, this should be the name as you wish it to be published. If you choose the second or third option, a name is still required, but it will not be published.

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. We will not publish these details.

## Page 7: Your views on the proposal

Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

**Please explain the reasons for your response**

Sanitary products are a necessity for every female. Females do not choose to have periods and as such free products would help young girls who may be embarrassed having to purchase them as well as helping other females who maybe can't afford to purchase them

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

**Please explain the reasons for your response**

I think it's a beneficial system but I'd be skeptical in people abusing the system

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; card-holders should have unlimited access to free sanitary products

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Schools, colleges, pharmacies, gp surgeries

## Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

I think it's essential for young girls to have access to free sanitary products in schools from personal experience

## Page 12: Personal experience (questions 6 and 7 are for individual respondents only)

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

I prefer not to say

Q7. If sanitary products were available for free, which of the following would apply to you?

I would expect to claim free products occasionally

**Please explain the reasons for your response**

Due to my line of work I sometimes don't have access to sanitary products

## Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector (e.g. local authorities, the NHS)	X					
(b) Colleges and universities		X				
(c) Businesses (including suppliers/retailers of sanitary products)		X				
(d) Individuals (including consumers of sanitary products)			X			

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

To be honest I have no idea how to go about making it cost effective but surely some sort of deal between the manufacturers and the government would be beneficial

## Page 16: Equalities

Q10. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation?

Slightly negative

**Please explain the reasons for your response**

I imagine some males will complain that females are receiving free products

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

Highlight the fact that females can't choose to have a period and also the fact that males receive free condoms and have done so for several years

## Page 18: Sustainability

Q12. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Unsure

## Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

It is about time that females received free essential products for something they cannot control
