Q1. Which of the following best expresses your view of the proposed Bill?

Partially supportive

Q1. Which of the following best expresses your view of the proposed Bill?

**Please explain the reasons for your response**

I am a bit conflicted about joining the labour party, because although I wish there was no such thing as poverty and I don't wish it on anybody, I don't believe in equality either, for the reason that we are all different. we all have different abilities, capabilities and levels of abilities. And so there is no such thing as equality. that being said, I am unemployed and I have fallen out with one of my friends who is Tory, because he has unfairly accused me of being lazy and having a poor work ethic. It was unfair because in my work place I suffered a lot of bullying and discrimination because I was born with multiple conditions and neurological problems and these have affected my abilities in the work place. So why can't the right wing stop being so mean spirited and stop accusing people of being lazy when it is mostly down to capability and availability? I think socialism and communism is unrealistic because of the reasons I have explained above, but why can't they at least have compassion? in fact inequality would be better in a way, if there was more compassion, but alas there isn't so that's why despite being conflicted I am more supportive of labour. wishing you luck in what you do.

## Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
<b>(a) Government and the public sector (e.g. local authorities, the NHS)</b>		X				
<b>(b) Colleges and universities</b>		X				
<b>(c) Businesses (including suppliers/retailers of sanitary products)</b>		X				
<b>(d) Individuals (including consumers of sanitary products)</b>		X				

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

not sure, I mean in terms of providing extra funding for the NHS, why not introduce a Health Insurance scheme, like in Europe to ease the financial strain on the NHS ( although admittedly this is a slightly different matter. )
