in the 6th richest country in the world and we behave towards poor women in a way that is reminiscent of a 3rd world country, it is shameful.

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

**Please explain the reasons for your response**

It means that the poorer women in society will be guaranteed that they will get the products and will not be tempted or coerced into spending the money wrongly.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

**Please explain the reasons for your response.**

It is fairer to give it to all women and avoid any embarrassment of having to prove that they are due this benefit.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All of the above.

## Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

Every effort should be made to make sure that there is ample provision and that provision should be widespread.
