

# Proposed Sanitary Products (Free Provision) (Scotland) Bill

## Page 2: About you

Are you responding as an individual or on behalf of an organisation?

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Please select the category which best describes your organisation

*No Response*

Please choose one of the following; if you choose the first option, please provide your name or the name of your organisation as you wish it to be published.

I am content for this response to be attributed to me or my organisation

Please insert your name or the name of your organisation. If you choose the first option above, this should be the name as you wish it to be published. If you choose the second or third option, a name is still required, but it will not be published.

Phyllis Douglas

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. We will not publish these details.

## Page 7: Your views on the proposal

Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

**Please explain the reasons for your response**

In today's economic climate many families have to juggle priorities. In some cases this leaves suitable sanitary protection low down the list. I know there are girls who only have 1 towel or tampon to last them 24 hours. This is dangerous to their health.

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

**Please explain the reasons for your response**

I would leave it to the professionals to decide the best method of distribution. Hopefully this would be discreet and not cause any embarrassment to the girls involved.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

**Please explain the reasons for your response.**

To limit it to families on benefits would be wrong. Some families don't qualify for benefits but are still "cash poor". I speak from personal experience.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Pharmacy would be my first choice as all girls have access to a chemist without drawing attention to themselves.

## Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

The majority of young women have access to these facilities in the first instance.

## Page 12: Personal experience (questions 6 and 7 are for individual respondents only)

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

Not applicable: I do not need or use sanitary products

**Please explain or give an example of your experience if you feel able to do so.**

While I don't now I did when I was a teenager in the 60's. I came from a working class background and it wasn't considered a priority. Though this was down to bad parenting rather than a lack of money!!!!

Q7. If sanitary products were available for free, which of the following would apply to you?

Not applicable: I do not need or use sanitary products

## Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector (e.g. local authorities, the NHS)						X
(b) Colleges and universities						X
(c) Businesses (including suppliers/retailers of sanitary products)						X
(d) Individuals (including consumers of sanitary products)						X

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

*No Response*

## Page 16: Equalities

Q10. What overall impact is the proposed Bill likely to have on equality, taking account of the following protected characteristics (under the Equality Act 2010): age, disability, gender re-assignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief, sex, sexual orientation?

Positive

Q11. In what ways could any negative impact of the proposed Bill on equality be minimised or avoided?

*No Response*

## Page 18: Sustainability

Q12. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Unsure

## Page 19: General

Q13. Do you have any other comments or suggestions on the proposal?

Only that I think it is an excellent idea. Many third world countries have problems providing adequate sanitary protection for their girls. Scotland shouldn't be among them. I have worked, over the years, with disadvantaged families and my colleagues and I, on more than one occasion, paid for towels/tampons out of our own pocket. I am now 67 and hoed things had improved!!
