Fully Supportive

Q1. Which of the following best expresses your view of the proposed Bill?

Please explain the reasons for your response

The dignity of everyone must be respected and every effort should be made to alleviate any circumstances which precludes this.

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Please explain the reasons for your response.

This appears to be the main 'client group' Putting a, medically verified, limit will, hopefully, preclude any MSM stories regarding "spongers" and the use of a 'debit-type' card means that it can be programmed to allow higher than 'normal' needs. The card should be introduced through the GP system where the 'normal' needs can be quantified and programmed in/onto the card when first issued.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

See response to previous question.

Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

Please explain the reasons for your response

"Emergencies" can happen anytime, anywhere....
