Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

**Please explain the reasons for your response.**

I think a limit would work as long as it is a relatively high limit enough to avoid exploitation of the programme but provide more than the average women would need just in case.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

I believe all schools should be able to dispense sanitary products as well as pharmacies , community centers , health clinics , homeless shelters and foodbanks. GP surgeries should be included as long as this wouldn't put any more strain on already busy surgeries.

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

It is absolutely unacceptable that any girl would feel unable to attend a form of education because she can't afford the sanitary products she needs.
