Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Please explain the reasons for your response

to have a period is not a choice and hygiene should be at the top of the agenda

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Please explain the reasons for your response

it has to be local and easily got with shopping, people do not always have the time to visit another clinic to get the supplies they need, or even posted out.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

Please explain the reasons for your response.

just because someone is not in receipt of benefits and manages their money well does not mean they are not struggling.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

I think you should be able to get from supermarket, people don't always have easy access to the above.

Yes

Please explain the reasons for your response

then children do not feel embarrassed about having to ask someone to provide them
