Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Please explain the reasons for your response

It is a human right to have access to sanitary items for health reasons and should absolutely not depend on people having enough money to afford this "luxury".

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

Please explain the reasons for your response

By placing where they are needed it means young women don't need to worry about carrying them or any stigma and means they are accessible immediately to those who might not be able to afford them and might need them urgently.
