Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

No

Please explain the reasons for your response

This still means that females have to go and "ask". The C-card system for condoms is an opt-in service and not compulsory for all young people to make use of, whereas for females the use of sanitary products is an essential requirement so they should not have to ask for them.

Q3. Which of the following best expresses your view in relation to a card-based system?

There is no need for a card scheme

Please explain the reasons for your response.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

schools would not be able to provide access during holidays so any of the above alternatives would be appropriate.

Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

No

Q7. If sanitary products were available for free, which of the following would apply to you?

I would not expect to claim free products
