I am against period poverty. This bill would ensure that women are cared for.

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Unsure

Please explain the reasons for your response

Haven't hear much about the card system!

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; its use should be restricted (e.g. by limiting the number of products that may be claimed each month)

Please explain the reasons for your response.

Women often find themselves in positions of need and should be supported regardless of income.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Pharmacies, colleges, schools, universities

Yes

Please explain the reasons for your response

Students are often in financially difficult situations, as well as frequently in public.
