Q1. Which of the following best expresses your view of the proposed Bill?

Fully Supportive

**Please explain the reasons for your response**

Q1. Which of the following best expresses your view of the proposed Bill?

I support this proposed Bill because I believe that sanitary products should be free for all those who need them as they are essential products for people who have periods.

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

**Please explain the reasons for your response**

I'm unsure of exactly how the C-Card system works because it's not something I am familiar with, however from what I have read I believe that this would be an effective method of providing free sanitary products to those who need them.

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available only to those on low incomes or in receipt of benefits; card-holders should have unlimited access to free sanitary products

**Please explain the reasons for your response.**

I think people who can afford sanitary products should buy them. For example, I know I can currently afford to buy my own sanitary products but I would feel uncomfortable using a card system personally because I would feel as though I was taking away the benefit from someone who does in fact need it.

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

All of the locations mentioned in the question, schools and universities would also be good locations as often people's periods start when it's least expected and at school where it can be difficult to get access to sanitary products.

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

Having no access to sanitary products at school when your period starts can make it very difficult to focus on your work and therefore can affect the quality of your education. Schools should provide sanitary products for free because it's unfair if students who don't have periods are having a higher quality educational experience than students who do have periods, simply because of biology. It might also reduce worries for students who

can't afford sanitary products.

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

No

Q7. If sanitary products were available for free, which of the following would apply to you?

I would not expect to claim free products

**Please explain the reasons for your response**

I am currently able to afford sanitary products so I wouldn't expect to claim free sanitary products

## Page 14: Financial implications

Q8. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have on:

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
(a) Government and the public sector (e.g. local authorities, the NHS)		X				
(b) Colleges and universities			X			
(c) Businesses (including suppliers/retailers of sanitary products)			X			
(d) Individuals (including consumers of sanitary products)					X	

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

Q9. Are there ways in which the Bill could achieve its aim more cost-effectively (e.g. by reducing costs or increasing savings)?

I'm not sure
